

Japanese Medium Tank Type 97 Chi - Ha /MODEL HOBBY/ by konradoo

Послан konradoo - 10.09.2016 18:59

Hello!

After a long battle introduce another model of the Japanese medium tank Type 97 Chi-Ha, a model similar to the previous version has been released for the MODEL HOBBY from Szczecin and the author of the study is Mr. Marian Sobel.

The model presents a vehicle with 3 companies, Regiment tanks in a typical painting company Malay 1941-1942. Number 31 on the hull means that it comes with 1 Shotai (platoon) of the said three companies. Construction of the model took about 1.6 years, and is a continuation of the plan to build two twins. Summing up the construction of two models It took almost three years with only minor interruptions.

Same model probably needs no introduction, on my part has been added: rivets, steel ropes, metal barrel KM-in, laser cut tracks. The model further increased with a lot of elements on the basis of the monograph AJ PRESS - JAPANESE armor and images found on the network. The model was made a little vignette and laser-cut inscription courtesy Publishing MODEL HOBBY, for which this site thank you Pictures of the model:

Воспользуйтесь онлайн переводчиком.

Автор не использует русский исключительно потому, что им не владеет.
